Visit Hong Kong's Greenest Waste Treatment Facility

written by Ecoco Mag | 23rd June 2016

Hong Kong produces 1,200 tonnes of sludge each day, but finally finds a solution to this waste issue – T-PARK.

'T' for 'transformation', T-PARK is one of the world's most technologically advanced facilities of its kind – and it's situated next to our homes in Tsang Tsui, Tuen Mun. As you read this, the sludge treatment facility initiated by the Environmental Protection Department Hong Kong is busy transforming Hong Kong's sewage waste into reusable energy through the use of advanced incinerating technology. Post-incinerated sludge is converted into ash and residue, which equates to a whopping 90% reduction of the original volume normally disposed into the landfills.

The entire facility is self-sufficient; meaning, everything from heat, electricity and water is self-generated to run its daily operations. Breathtaking is also the exterior and surroundings of the facility itself, designed by renowned French architect Claude Vasconi with eco-friendly materials and environmental sustainability in mind. Starting 29 June 2016, visitors can enjoy complimentary educational, ecological and recreational facilities of the Park by booking reservations in advance (currently a 1-2 month waiting list!).

Here are the features and facilities you can expect to experience at the Park:

T-THEATRE

Begin your educational journey at the theatre and watch an introductory video of T-PARK.

T-HALL

Everything you need to know about the facilities can be learnt from the exhibition hall, where interactive and educational video clips await you.

T-GALLERY

Life-size models of the incinerating equipment are on display to demonstrate the scale and complexity of its process. Videos are also viewable for a peek into the daily operations!

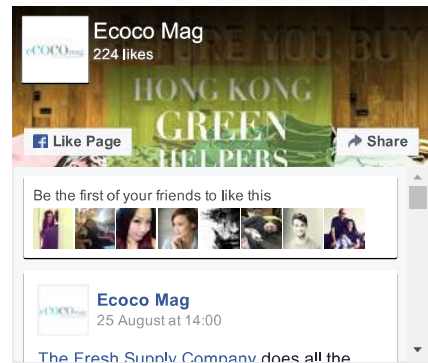

T-SPA

STAY INFORMED

We promise not to overflow your inbox – after all, we're all for waste reduction – rather, we'll email you worthy content and updates that'll serve your best interests at heart.

SEARCH

Three large pools of varying temperatures are heated by the self-generated incineration technology for visitors to dip in and relax as they take in the sea view of Deep Bay.

T-SKY

Located on the 10/F, T-SKY is an observatory floor with sweeping views of its surrounding. Furnishing and displays made from upcycled objects are also available for visitors to enjoy.

T-ROOF

The rooftop is a nice and quiet retreat for visitors that want a different perspective view of the outdoor area surrounding the facility.

T-GARDEN

The garden is an expansive 9,800 square metres of outdoor landscape, with a large outdoors footbath to soak your stress away.

T-CAFÉ

Sit down with a cuppa at the self-servicing café, decorated with eco-friendly furniture and using sustainable utensils. *(Under construction).*

T-PARK, 25 Nim Wan Road, Tsang Tsui, Tuen Mun, tpark.hk
